CONTENTS OF VOLUME

Number 1

S. M. Hwang and S. Kobayashi	1	Preform design in shell nosing at elevated temperatures
W. B. Rowe, W. F. Bell and D. Brough	15	Limit charts for high removal rate centreless grinding
S. Haranath, N. Ganesan and B. V. A. Rao	27	Dynamic analysis of machine tool column with damping layer—finite element approach
S. Haranath, N. Ganesan and B. V. A. Rao	43	Dynamic analysis of machine tool structures with applied damping treatment
Wang Ning Sheng and B. J. Davies	57	A high level approach to programming a robot
C. Tuncer and T. A. Dean	65	Die design alternatives for precision forging hollow parts
N. G. Subramanya Udupa, M. S. Shunmugam and V. Radhakrishnan	77	Influence of workpiece on roundness error and surface finish in centreless grinding
S. H. Choi and T. A. Dean	91	Computer aided design of die block layouts
V. R. Reddy and A. M. Sharan	105	The static and dynamic analysis of machine tools using dynamic matrix reduction technique
V. K. Jain, P. G. Yogindra and S. Murugan	113	Prediction of anode profile in ECBD and ECD operations
N. N. S. Chen and W. K. Pun	135	The effect of variation of rake angle on wear land stress in metal cutting

Number 2

Y. A. Bocharov and A. V. Vlasov	143	Computer aided analysis of screw press dynamics
C. Yuan	155	The optimal method of interpolation operation in NC—feeding according to the closest distance
K. Nagasaka, T. Yoshida, Y. Kita and F. Hashimoto	167	Optimum combination of operating parameters in abrasive cut-off
Li-Jiang Wang and Ji Zhao	181	Influence on surface roughness in turning with ultrasonic vibration tool
Y. S. Wong, M. Edkins and C. F. Noble	191	An investigation of the power output and gap voltage during electrical discharge machining using microcomputer-based instrumentation
G. Byrne	215	Thermoelectric signal characteristics and average interfacial temperatures in the machining of metals under geometrically defined conditions
N. Constantinides and S. Bennett	225	An investigation of methods for the on-line estimation of tool wear
A. H. Slocum	239	Design to limit thermal effects on linear motion bearing performance
M. R. H. Khoyi and R. H. Thornley	247	Application of orthogonality principle in complex modulus measurements of highly rigid and damped specimens
Z. Pálmai	261	Cutting temperature in intermittent cutting
New Patents	i	

Number 3

M. K. Ghosh and N. S. Viswanath	275	Frequency dependent stiffness and damping coefficients of orifice compensated multi-recess hydrostatic journal bearings
D. W. Wu	289	Prediction of shear angle variation in orthogonal wave-removing processes
H. Kankaanpää and A. S. Korhonen	305	Effects of cutting geometry in turning with TiN-coated tools
J. H. Kim, D. Y. Yang and M. U. Kim	311	Analysis of three-dimensional upset forging of arbitrarily-shaped prismatic blocks
C. Tuncer and T. A. Dean	325	A new pin design for pressure measurement in metal forming processes
Abdul B. Sadat	333	Surface characteristics of machined Inconel-718 nickel-base superalloy using natural and controlled contact length tools
S. S. Patil, S. S. Pande and S. Somasundaram	343	Some investigations on vibratory tapping process
Jiluo Zhou	351	On the cutting stability of the lathe under different working conditions
I. Yellowley	357	A simple predictive model of orthogonal metal cutting
Y. Altintas and I. Yellowley	367	The identification of radial width and axial depth of cut in peripheral milling
R. H. Thornley, A. B. I. El Wahab and J. D. Maiden	383	Some aspects of twist drill design
M. A. Elbestawi and R. Sagherian	399	Parameter adaptive control in peripheral milling
New Patents	i	

Number 4

	415	Obituary
C. W. Lee, S. C. Chung and J. S. Kim	417	Geometric adaptive straightness control system for the peripheral end milling process
M. Rahman, M. A. Mansur, W. D. Ambrose and K. H. Chua	431	Design, fabrication and performance of a ferrocement machine tool bed
J. Monaghan and B. Duff	443	The effects of external loading on a yield tightened joint
S. A. Kassem and H. A. Arafa	457	Design aspects of four-nozzle hydraulic servovalves
V. S. R. Murthy and P. K. Philip	469	Pulse train analysis in ultrasonic assisted EDM
B. S. Tong and D. Walton	479	A computer design aid for internal spur and helical gears
B. S. Tong and D. Walton	491	The optimisation of internal gears
P. K. Ramakrishna Rao and M. S. Shunmugam	505	Analysis of axial and transverse profiles of holes obtained in B.T.A. machining
New Patents	i
